

# PART 3

# – DETECTING CERVICAL PRE-CANCER

**Cervical Cancer Policy**

Early diagnosis and treatment of  
#CervicalCancer can save your life.  
Treating pre-cancerous changes can  
ensure they do not develop into  
true cancers.

#LetstalkAboutCancer

**Cervical Cancer Policy**

It is your right to receive free  
#CervicalCancer screening and if a  
cervical abnormality is detected you  
must be offered pre-cancer treatment.  
#LetstalkAboutCancer

**Cervical Cancer Policy**

Precancerous changes in the cervix often have no signs or symptoms so they can be undetected unless regular tests are done.  
#LetstalkAboutCancer

**Cervical Cancer Policy**

The most common test for  
#CervicalCancer is the pap smear. You  
can ask for your free test at your  
nearest primary health care clinic.
